

CHI St. Francis Health

Community Benefit Report FY2022

Leadership is proud of our staff's resilience through the pandemic's challenges. St. Francis became a connecting point for providers collaborating to meet community needs. We were able to address financial needs and services totaling more than \$2 million for our community. Our vision is to continue building resources and improving care delivery. Our staff works as a team to grow services, embedded with the mission that guides relationships of the past for building health care's future.
