

Transplant

As part of your health care team, CHI Health Specialty Pharmacy helps you stay on top of your medications, which are crucial to preventing complications with transplanted organs.

We're Your Go-To Experts

Our pharmacists and technicians are specially trained to understand and meet the needs of transplant patients. We can provide the guidance and support you need to ensure you're taking your medications accurately to help avoid complications. **Should you have any questions or concerns, we're here to talk to you, 24/7.**

Managing Your Medication Supply

A lapse in your treatment can disrupt your care and create potential problems, so we'll call regularly to check on your supply. You'll receive an initial phone call to set up a prescription delivery schedule, then we'll contact you each month to ask what medications and related supplies you need. We'll make sure you receive them quickly, no matter where you want them delivered. And they'll always be shipped with care.

Your Financial Advocate

Staying healthy is your number one priority, not worrying about paperwork. Our Patient Financial Advocates will help you every step of the way to navigate the necessary insurance forms and answer your questions. They will also advocate on your behalf to make sure you are billed correctly.

At CHI Health Specialty Pharmacy, we're committed to consistently providing the personalized service that you deserve. For more information or if you have questions, call us toll-free at 1.855.267.9234 or visit CHIhealth.com/specialtypharmacy.
